

**TROPONIN T (HS) - AMBULATORY**  
14933/LAB14933

**QUICK REFERENCE**

Effective January 3, 2023, the Troponin T (hs) assay (14933/LAB14933) will be offered in place of the current Troponin I assay (5045/LAB5045) for testing submitted to Allina Health Central Laboratory in Minneapolis/Abbott Northwestern Hospital.

**DETAILS**

The transition to Roche instrumentation is being phased out over time and is only occurring at the Allina Health Central Laboratory in Minneapolis on January 3, 2023. The Roche platform utilizes the Troponin T (hs) assay. All other Allina sites that perform testing on the Architect analyzer will continue on the Troponin I until they transition. This is not a stat test. If the patient is having symptoms, they need to be sent to the nearest Hospital Emergency room. Please review the test information in the [Allina Health Laboratory test catalog](#) and be aware of reference range changes when evaluating results.

**Troponin T (hs) - Ambulatory-14933**

Test info	Specimen	Performance	Clinical and Interpretive info	Billing	Tracking
<b>Test name:</b>		Troponin T (hs) - Ambulatory			
<b>Test number:</b>		14933			
<b>Excellian order number:</b>		LAB14933			
<b>Abbreviation:</b>		TRT			
<b>Alternate names:</b>		hs cTNT Trop T high sensitive Troponin T Gen 5 Trop			
<b>Tests included:</b>		Quantitative Troponin T will be performed at an additional charge on all indeterminate or positive Qualitative Troponin			
<b>Useful for:</b>		Cardio-specific, highly sensitive marker for myocardial damage.			

*If you are an interfaced client, and this is a test that you may utilize at your facility, contact your Account representative to obtain build information and arrange testing*
