The suggested alternate is the Thyroglobulin, antibody (14687/LAB14687), referred to LabCorp.

**Thyroglobulin antibody-14687**

Test info	Specimen	Performance	Clinical and Interpretive info	Billing	Tracking
<b>Test name:</b>		Thyroglobulin antibody			
<b>Test number:</b>		14687			
<b>Excellian order number:</b>		LAB14687			
<b>Alternate names:</b>		Antithyroglobulin Antibody			
<b>Useful for:</b>		Detect and confirm autoimmune thyroiditis, Hashimoto thyroiditis			
<b>Limitations:</b>		Thyroglobulin antibody results should be interpreted in light of the total clinical presentation of the patient, including symptoms, clinical history, data from additional tests, and other appropriate information.  This test may exhibit interference when sample is collected from a person who is consuming a supplement with a high dose of biotin (also termed as vitamin B7 or B8, vitamin H, or coenzyme R). It is recommended to ask all patients who may be indicated for this test about biotin supplementation. Patients should be cautioned to stop biotin consumption at least 72 hours prior to the collection of a sample.			

Complete test information is available in the Test catalogue.
