

Excellian non-interfaced charges resource

There are some occasions where charges for laboratory testing referred to Allina Health Laboratory will not cross the interface, and thus not post automatically on HARs. Charges that are not interfaced have an accession in the client portal, or on the client notification, that starts with RQ or B. These accessions should be reviewed and the corresponding charges posted manually.

- RQ is a charge to a non-interfaced test.
- B signifies a reflex or additional charge that needs to be manually posted.

Accession ID's beginning with C or AC will file automatically, and would not require review.

Below is an example of the information included on a Notification spreadsheet.

***Note:** If using the PDF notification, the Accession# is referred to as the Lab#

Date	Procedure	Description	CPT Code	Diagnosis	Patient Name	Accession #	Amount	
05/01/18	19191919	TEST CHARGE	00000	ICD 10	NORMAL, CHARGE	C123456 or CRQ123456	1.00	Corresponding charge is filed automatically on the invoice.
05/02/18	19191919	TEST CHARGE	00000	ICD 10	NOT, INTERFACED	RQ789456	1.00	These would need to be reviewed as they are not interfaced (<i>no change</i>)
05/03/18	19191919	TEST CHARGE	00000	ICD 10	LATE, CHARGE	AC456123 or ACRQ456123	1.00	These should <i>not</i> need to be reviewed as the corresponding charge filed automatically on the invoice. These are generally late charges that had to be manually added only on the Allina Health side.
05/04/18	19191919	TEST CHARGE	00000	ICD 10	MANUAL, CHARGE	B654321 or BRQ654321	1.00	These would need to be reviewed as they are manually added charges, not interfaced. Example would be a reflex test.
