

## New test

---

**Test name:** Quantitative lymphocyte subsets

**Test #:** 14271/LAB14271

**Notification date:** July 16, 2020

**Effective date:** August 4, 2020

---

Effective August 4, 2020, the Allina Health Laboratory will offer Quantitative lymphocytes subsets by Flow Cytometry.

The Quantitative lymphocytes subsets is useful for:

- Immunological assessment of normal individuals and patients having, or suspected of having, immunodeficiency
- Initial screening and follow up monitoring of patients with primary immunodeficiencies
- Assessment of immune reconstitution post hematopoietic cell transplantation
- Screening for gross quantitative anomalies in lymphocyte subsets in infection or malignancies
- Any clinical scenario where enumeration of major lymphocyte subsets in peripheral blood is indicated

<b>Name</b>	<b>Quantitative lymphocytes subsets</b>
Test #	14271
Excellian order	LAB14271
Abbreviation	TBNK
Specimen	4mL EDTA whole blood
Transport/stability	Ambient (strict) – 24 hrs
Days set up	Mo – Fr
Turn around time	2 days
