

PRO-BNP
83880/LAB83880

QUICK REFERENCE

Effective January 3, 2023, the Pro-BNP assay (83880/LAB83880) will replace the current BNP assay (5531/LAB5531) for specimens submitted to Allina Health Central Laboratory in Minneapolis/Abbott Northwestern Hospital.

DETAILS

The transition to Roche instrumentation is being phased out over time and is only occurring at the Allina Health Central Laboratory in Minneapolis on January 3, 2023. Other Allina hospital locations will be rolling out this testing during the first and second quarter of 2023.

Measured concentrations of Pro-BNP are higher due to its longer half-life. Information on changes to specimen requirements and reference ranges can be found on the [Allina Health Laboratory website](#).

Pro-BNP-83880

Test info	Specimen	Performance	Clinical and Interpretive info	Billing	Tracking
Test name:		Pro-BNP			
Test number:		83880			
Excellian order number:		83880.0			
Abbreviation:		PBNP			
Alternate names:		NT-Pro BNP proBNP NT-Pro Brain natriuretic peptide BNP			
Useful for:		This assay is performed on the Roche analyzer platform beginning 1/3/2023. This assay is used as an aid in the diagnosis of individuals suspected of having congestive heart failure. The test is further indicated for the risk stratification of patients with acute coronary syndrome and congestive heart failure. The test may also serve as an aid in the assessment of increased risk of cardiovascular events and mortality in patients at risk for heart failure who have stable coronary artery disease.			

If you are an interfaced client, and this is a test that you may utilize at your facility, contact your Account representative to obtain build information and arrange testing
